

Course Title	AS Level Critical Thinking
Level	Level 3
About the Course	<p>Critical Thinking is the analytical thinking which underlies all rational enquiry. It is characterised by the careful and reflective consideration of reasoned argument and of the beliefs and claims that comprise arguments.</p> <p>It enables you to develop a wide range of thinking skills as well as the essential skills of communication, problem solving, analysis and evaluation. It encourages open mindedness, curiosity, inventiveness and imagination, as well as being rigorous in its methods. You will be encouraged to make reasoned judgements based on evidence rather than assumption or prejudice, and to generate your own arguments.</p> <p>Critical Thinking is an intellectually demanding course and will challenge the most able of students. It is a skills based rather than content based course.</p>
Progression Routes	<p>It will equip you with skills to use in life, work and further academic study. It encourages attitudes which complement other courses across the curriculum, and will help you prepare for the academic and intellectual demands of Higher Education, as well as future employment and life in general. It will help you prepare for the admission process to Oxbridge and other prestigious universities.</p>
Method of Assessment	100% Examination assessed.
