|----------------------|---|
| Course Title | GCSE Science |
| Level | Level 2 |
| About the Course | <p>This is intended as a re-sit course for students who have recently achieved a Grade D in the GCSE Core Science course. Students study towards achieving the single GCSE AQA Core science award.</p> <p>There are four main areas of work, each having an equal weighting towards the final grade; these are Biology, Chemistry, Physics and Experimental and Investigative assessment.</p> |
| Progression Routes | <p>Students who intend go into primary teaching require a GCSE in Core Science at grade A* to C. It is also required for midwifery, and strongly recommended for those students intending to enter the nursing and caring professions</p> |
| Method of Assessment | <p>Students take examinations in Biology, Chemistry and Physics. Each examination is of one-hour duration and worth 25% of marks. The remaining 25% is allocated to the assessment of experimental and investigative skills.</p> |
